

Shropshire EPR comparison of main areas of mandatory functionality

Mandatory Functionally	Option 1 – Advanced Health & Care	Option 2 - EMIS	Option 3 – RiO
Bed Management and associated basic patient management functions	Currently not sufficiently developed within the product	Not included in EMIS, available via a 3 rd party application at an additional cost	Available
Clinic management	This functionality is not available in AH&C, unknown if available or practical to implement via a 3 rd party, if so would be at an additional cost.	Available	Available
Caseload management, including discharges	Available	Not included in EMIS, unknown available via a 3 rd party	Available
Clinical records management; including tracking and searching	This functionality is not available in AH&C, unknown if available via a 3 rd party, if so would be at an additional cost.	Not included in EMIS, unknown available via a 3 rd party	Available
Clinical records management: coding	AH&C does not at present support SNOWMED CT coding This is a significant issue. It is possible to purchase 3 rd party applications at an additional cost.	EMIS does not at present cover all ICD10 or OPCS4 coding for non-community settings. This is a significant issue in terms of contractual elective and non-elective activity. It is possible to purchase 3 rd party applications at an additional cost.	Available
Minor Injuries	Available	The current version of	Available

functionality both clinical and reporting		<p>EMIS does not provide the necessary functionality that our clinicians consider the basic minimums. Nor does it allow the Trust to correctly account for monitoring waiting times in MIUs.</p> <p>A fully functional 3rd party product would be available at an additional cost.</p>	
Medicines Administration	This functionality is not available in AH&C, available via a 3rd party, would be at an additional cost.	Available	Available
Mobile working	<p>The provision of this functionality is crucial in the NHS Trust being able to achieve its modernisation and transformation agenda around having a truly mobile community workforce.</p> <p>A fully functional 3rd party product would be available at an additional cost.</p>	<p>The provision of this functionality is crucial in the NHS Trust being able to achieve its modernisation and transformation agenda around having a truly mobile community workforce.</p> <p>A fully functional 3rd party product would be available at an additional cost.</p>	Available
Waiting list management	Available	It is unlikely that a 3rd party product would be economically viable to provide integration into the clinical record for this functionality.	Available

Ordering Test/Request	A fully functional 3rd party product would be available at an additional cost.	Available	Available
Prescribing	A fully functional 3rd party product would be available at an additional cost. This ties into Medicines management	Available	Available
